

FIELDREVEAL SAMPLING APP

NEW! Perform soil sampling in the field with **FieldReveal Mobile**. Use existing soil sampling missions or create your own in the field. FieldReveal Mobile Soil Sampling gives you the flexibility to sync your collected data to the FieldReveal database or take it with you anywhere using a cloud connection or USB device.

APP FEATURES

- Perform soil sampling in the field
- Create new Sampling Points in the field
- Collection and modification of Field Boundaries
- Collection of in-field points and polygons
- Automatic upload of Field Boundaries and Sampling Points back to your FieldReveal Mapping Center
- Integrate with Microsoft OneDrive or simply use a USB drive for third-party data collection
